

OUR FIRST MOBILITY IN LIBEREC, CZECH REPUBLIC

November 2021

The very first mobility of our project was to Liberec, Czech Republic, hosted by Základní škola Lesní. The meeting was a huge success, even more so given the challenging situation all across the world due to Covid. Members of all of the partner schools met up on Monday, November 1st in Prague, where we all introduced ourselves and had a wonderful day exploring the most important historical sites of Prague.

The next day, we travelled to Liberec, where we spent the remainder of the mobility. Základní škola Lesní hosted an official welcome meeting introducing the school, its administration, and its philosophies.

Deputy Headmaster Tomáš Řebíček lead an immersive and in-depth session in which our partners learned about a multitude of ICT applications and tools that can be used in the classroom and beyond. These include such applications as Green Scéen, Book Creator, ChatterPix, ClassroomScreen.com, Socrative.com, StoryboardThat.com, EdPuzzle.com, Flipgrid, and JigsawPlanet.com, among others. All of the participants were able to try these application on their own and learn how to use them.

In addition to other cultural discoveries, we were also all treated to a private tour of the Liberec Town Hall, with a special welcome speech by Deputy Mayor Mgr. Jiří Šolc.

We were even invited to visit the town hall tower, a rare opportunity, even for longtime Liberec residents!

The success of this mobility was established by our new-found friendships, the knowledge we gained during the week, and the momentum it has created for our upcoming activities.
